Curcumin, the active constituent of turmeric, is a powerful antioxidant and anti-inflammatory agent. However, humans have difficulty absorbing adequate amounts of curcumin and what little is absorbed is quickly excreted. Therefore, large doses have been used therapeutically in promoting joint comfort, supporting heart health and providing antioxidant protection, but this often results in such unwanted side effects as stomach upset.* MicroActive® Curcumin provides a marked improvement over standard curcumin powders and supplements because of its ability to deliver this ingredient in a special micronized, sustained-release matrix that increases absorption and bioavailability.* Backed by human clinical studies, Curcumin-SR is a nutritional supplement that features this MicroActive® Curcumin matrix and offers sustained release over 8 hours,* 10x greater absorption than regular curcumin,* and releases slowly over time so that blood levels remain consistently elevated.*
